

Mobile Applications

The Bell Techlogix Difference

Bell Techlogix has over 25 years of experience in delivering IT Technology Solutions. Our certifications and broad experience include Apple, Dell, EnterMo, HP, IBM, Intermec, Microsoft, RIM, Sprint, Symbol and other industry leaders. Our core team of subject matter experts currently carries over 450 industry certifications. This combination of experience and expertise allows us to deliver complete IT and Mobile Solutions on-time and on-budget. Our commitment to our clients is evidenced by the fact that we currently manage over 500,000 IT assets. Our Mobile Solution Suite assists IT Executives in better defining their environment and planning for future growth while ensuring the optimized delivery of Mobile Services.

Enabling Mobile Workers...

Our primary objective is to help companies optimize their mobile device environment. Whether you have remote agents, employees working at home, service personnel at customer sites or executives on the move, the needs of the user and the needs of the business remain the same. They need immediate access to information that can help them solve business problems...on the spot!

Whether the application is associated with a back-end system, resident on the mobile device or a combination of the two; Bell can help you analyze, select and deploy the mobile applications and tools required that make your business work anytime, anywhere...

Our Mobile Solutions Suite provides the following:

- ✓ Reduced TCO and improved ROI through more efficient supplier management;
- ✓ Increased speed of access to information;
- ✓ Improved end-user service levels and productivity;
- ✓ A more secure mobile environment;
- ✓ Applications that will improve your business.

Computing and Handheld Solutions

There is an array of mobile devices available, each offered by a number of different providers to assist enterprises in enabling their mobile workforce: mobile phones, laptops, smartphones, scanners, ruggedized devices and custom handhelds. Bell leverages its expertise in mobility to help clients select the device that best fits their business requirements, operates efficiently with their applications and has the least disruptive impact on business processes.

Broadband Solutions

Access, speed and availability of applications are critical to the success of your business, regardless of whether employees are at a corporate location, in a home office or at a remote site. Bell delivers primary and back-up broadband solutions that ensure high availability of applications to remote workers. Bell also assists clients in designing and implementing Public Wi-Fi Hotspot Solutions.

Professional Services

Bell Techlogix experts can help you define a strategic approach that addresses the financial impacts, security implications, implementation and support requirements associated with mobile device deployments. With over 25 years of experience in lifecycle services, Bell understands the implications from deployment through disposal.

Professional Services include:

- Assessments: Detailed analysis of existing mobile platforms, applications and processes;
- Design and Implementation Services;
- Consulting: Defining mobile applications and potential business impact.

Enabling your employees to take full advantage of the benefits of mobility involves making all of your mobile devices an integral part of your business, just as you do with other IT assets. Our goal is to ensure that your mobile applications drive meaningful bottom line results.

It's our business to help you improve yours!
