

Mobile Solutions Suite

The Bell Techlogix Difference

Bell Techlogix has over 25 years of experience in delivering IT Technology, Lifecycle Support and Service Desk Solutions. Our commitment to clients is evidenced by the fact that we currently manage over 500,000 IT assets. Bell leverages this experience to offer a full lifecycle of services to support mobile devices and applications. Our Mobile Solution Suite assists IT Executives in better defining their environment and planning for future growth, while ensuring the optimized delivery of mobile services.

Competing in a Mobile World...

The emerging challenge for organizations is how to enable users to take full advantage of mobile technologies, while managing the significant complexity, costs and risks that can be created by a mobile workforce. Bell helps its clients to balance enablement and management in an effort to optimize the value of their mobile investment.

Our Mobile Solutions Deliver...

- ✓ Reduced TCO through enhanced supplier, carrier and end-user management;
- ✓ Increased speed of access to information;
- ✓ Ability to access, monitor, update and control all devices deployed in the field;
- ✓ Improved end-user service levels and productivity;
- ✓ A more secure mobile environment;
- ✓ Powerful applications that improve business processes.

Mobile Enablement delivers Increased Productivity

Bell enables mobile workers by making the procurement and use of mobile devices easy and efficient. Bell enables management by providing the expertise and tools to define and enforce mobile policies and Bell enables Executives by impacting bottom line results.

- Procurement and Deployment
- Policy Development and Enforcement
- Server and End-user Administration

Mobile Optimization delivers Real Cost Savings

Bell delivers meaningful savings, often as much as \$160 per user in year one alone. We help clients manage their mobile devices, wireless carriers and wireless plans. Our advanced tools remotely interface directly with devices in the field to assist in deployments, enforcement of policies and remotely locating and/or wiping lost devices.

- Wireless Expense Optimization
- Asset Management
- Mobile Device Management

Mobile Support delivers Improved Service Levels

Leveraging our world-class 24x7x365 Contact Center, Bell offers a full suite of services to assist clients in deploying and maintaining their mobile platforms. With expertise across an array of mobile technologies, Bell excels at handling single or multiple vendor implementations. We drive productivity by improving service levels, increasing availability and reducing downtime through our Mobile Support Solutions:

- Mobile Service Desk – Self Service, Tier 1 and Tier 2
- Mobile repair and Depot Services
- Refresh / Retire / Recycle
