An Easy, Affordable and Effective way to Reduce Your Wireless Costs...

Our Wireless Optimization Service helps you cut costs and eliminate wireless waste by ensuring that you're paying only for the services you need – at the lowest price points.

- Are your mobile employees on the best plan?
- Are you “only” paying for the services you use?
- Do you have the tools to track and measure?
- Do you know where all your mobile assets are?
- Are they secure and are you in control?

We are different, because we go beyond optimization – we optimize, manage and help you control your mobile environment on an ongoing basis. Using a proven methodology, we reduce first year wireless spend by an average of \$160 per user.

It's Easy, we deliver...

1. Perform 40+ point audit check to uncover billing errors;
2. Cost analysis of services, features & usage of each user;
3. Complete cost optimization for voice, data & messaging;
4. Change management on all savings opportunities;
5. Monitoring & notification of specific usage trends/user;

...it's Effective, you save!

Lower your wireless expenses by \$160/user in year one. Receive quality execution with binding SLA's. Avoid expensive training and refocus your resources on core initiatives. Add Bell's best-in-class Support Services for a fully integrated solution that lets you leverage the true power of mobility.
