

The Bell Techlogix Difference

Corporate Fact Sheet

Bell's objective is to create the ultimate end-user experience that directly results in decreased costs, increased customer retention, new revenue opportunities and improved operational efficiencies for small and mid-sized companies, as well as Fortune 500 companies. Bell focuses on enterprises that are regional and national in scope and excels in specific verticals such as Education, SaaS providers, and internal corporate help desk support. To accomplish this ambitious feat, Bell offers and closely manages a comprehensive set of Project Based and Managed Services resulting in Technology Solutions that deliver efficient, effective, and positive experiences to your customers and users.

Bell Techlogix has over 25 years of experience in delivering IT Technology Solutions. Our certifications and broad experience include Apple, Dell, HP, IBM, Microsoft and other industry leaders. Our core team of subject matter experts currently carries over 450 industry certifications. This combination of experience and expertise allows us to deliver complete solutions on-time and on-budget. Our commitment to our clients is evidenced by the fact that we currently manage over 500,000 IT assets. Our Technology Solution Suite assists IT Executives in better defining their environment and planning for future growth while ensuring the optimized delivery of IT services resulting in improved service levels and quantifiable cost savings.

Focused:

We excel at performing non-core IT functions and projects that ...

- reduce IT operations costs
- improve IT service performance

...to allow our clients to focus on their core business!

Skilled:

To provide the best user experience, Bell Techlogix offers a suite of services and solutions that assist enterprises in the execution and support of non-core IT functions, as well as the introduction, deployment and management of emerging technologies.

From a single product acquisition through Bell Direct, our on-line procurement tool, to an advanced managed service desk support model, you can trust Bell to provide you with the right solutions to meet your ongoing technology needs.

Project Based Services: Executing technology based projects that occur over a short and distinct period of time.

- Technology Procurement and Deployment
- Software Licensing and Migration
- Virtualization and Consolidation
- Technology Assessments

Managed Services: Managing and supporting ongoing non-core IT functions that allows IT resources to focus on core IT initiatives.

- Service Desk Support
- Tier II and Tier III Technical Support
- Repair, Depot and Maintenance
- Disposal, Remarketing and Retirement

Technology Solutions: Building IT Solutions by leveraging experience and expertise in delivering project based and managed services.

- Life Cycle Asset Management
- Mobile Device Management
- Reverse Logistics
- Custom Solutions

Reliable:

Bell can help you to increase business agility, improve access to information and speed of response to your customers, while managing costs and improving service levels. At Bell Techlogix we establish and cultivate long-term client relationships because we do what we say we're going to do and we do it on time and on budget.

It's our business to help you improve yours!
